Cadamin™ Varna

Marine Ornamental Fish Feed

- 'Varna' is a scientifically evaluated, slow sinking marine ornamental fish feed.
- Constituents: 38% protein, 9% fat, 39% carbohydrates, 7% ash (minerals) and less than 2% fiber. Contents are marine protein, soy protein, wheat flour, oil vitamins, minerals, colour imparting nutrients like carotenoids from natural sources, immune promoters, probiotics and antioxidants.
- Availability in particle size: 0.25mm, 0.75 mm and 1 mm.
- Recommended usage: Feed 2-3 % of the fish body weight once in a day.

For further information please contact: The Director,
Central Marine Fisheries Research Institute

E-mail: director@cmfri.org.in, Web: www.cmfri.org.in Tel: 0484-2394867; Fax: 0484-2394909

Cadamin™ Green Algal extract

Natural in every sense

Cadamin™ GAE

- A 100% vegetarian nutraceutical from nature for joint pain and arthritis
- GAE is a natural alternative to synthetic nonsteroidal anti-inflammatory drugs (NSAIDs) without any harmful side effects
- A highly cost-effective and indigenous product

PREFACE

Marine fishery resources are renewable and limited, therefore management of the harvest of marine fishery resources is necessary for sustained production from the sea. Towards this, it is very much essential to have reliable and updated knowledgebase on status of marine fishery resources, fishing effort expended, number of fishing villages, number of landing centres, fisherfolk population, their educational status, occupational status, infrastructure facilities existing in fishing villages, fishing crafts, fishing gears etc. For generating such information the Central Marine Fisheries Research Institute (CMFRI), Cochin has been periodically conducting frame surveys. The first marine fisheries census was conducted by CMFRI in 1980 with the support of Ministry of Agriculture. Second marine fisheries census on all India basis was conducted during 2005. Dynamic changes have taken place in the fishery and there were many management interventions introduced by the state and central governments from time to time. Changes have also taken place in the crafts and gear, fisherfolk population structure, availability of resources and their spread, infrastructure facilities, educational status etc.

In view of the dynamic nature of the marine fisheries sector, the policies and interventions need to be reviewed periodically. Reliable updated real time data on different aspects of marine fisheries is very much essential for developing suitable policies and interventions. The Department of Animal Husbandry Dairying and Fisheries (DAHDF), Ministry of Agriculture, Government of India during the 11th five year plan has taken up a central sector scheme on “Strengthening of database and Geographical Information System for fisheries sector” with Census on Marine Fisheries as one of the components which was assigned to CMFRI for the second time, considering the expertise and experience in conducting the massive census on all India basis.

The list of marine fishing villages for the different maritime states and union territories formed the frame for the census, which was

updated with the most recent information received from the respective state fisheries departments. This information was validated by conducting a pre-census survey. In addition to the task of selection of enumerators for the conduct of census operation, information on number of households in each village was also collected during the pre-census survey. The necessary schedules for collection of information from marine fishermen households were developed by conducting a series of workshops at CMFRI headquarters, regional and research centers. The data collection schedules so developed was approved by the Technical Monitoring Committee set up by the DAHDF. Workshops and trainings were also conducted at different locations for the field level supervisors and enumerators regarding the filling up of different schedules. Instructions were also prepared and distributed to field level supervisors and enumerators on each item of entry in the schedules. The census was carried out through 2,074 enumerators in 3,288 marine fishing villages and information from 8,64,550 households were collected. The entire operation was carried out under the supervision at different levels by the scientists and technical staff of CMFRI. The schedules used for enumeration were bilingual, both in English and local language.

The final report is in two parts, Part I with information at national level and the Part II is for each maritime state. The scope, time frame, parameters, definitions, type of schedules etc. are also described in Part I. This document is a consolidated report for the Union Territory of Puducherry, covering 40 marine fishing villages along the four coastal districts, which provides districtwise information on marine fishing villages, fish landing centres, population structure, educational status, socio-economic profile, occupation together with the ownership pattern of crafts and gears among fisherfolk. It is also intended to provide a summary of the crafts in the fishery and the infrastructure facilities available in the marine fishing villages in the state.

It is my pleasure to use this opportunity to thank the DAHDF and the Indian Council of Agricultural Research (ICAR) for having trust in CMFRI in its ability to take up the arduous task of carrying out the National Marine Fishery Census 2010. At this juncture I take the opportunity to thank the DAHDF for accepting the CMFRI national marine fisheries data (after reconciliation with states) as the official data of Government of India. I thank the state fisheries department for extending all the supports for the successful conduct of census. The sincere and hard work carried out by Fishery Resource Assessment Division staff need special mention and I thank each one of them. Special thanks are due for all the scientific, technical and administrative staff of CMFRI who were involved in one way or other in the conduct of census. Finally, appreciations also go to Dr. E. Vivekanandan, Dr. H. Mohamad Kasim and Dr. G. Mohanraj, present and former Scientists-in-Charge of Madras Research Centre of CMFRI for the support and help rendered in completing this program successfully. I am sure this report will be of enormous use to all associated with the development of marine fisheries.

SUMMARY

Marine Fisheries Census 2010 was carried out in four coastal districts of Puducherry namely, Yanam, Puducherry, Karaikal and Mahe during April-May, 2010. The scope, time frame and terms used are described in Part I of the Marine Fisheries Census Report. The significant features are summarized below. Fishing villages and landing centres

Fishing villages and landing centres

- There are 40 marine fishing villages wherein fishermen reside. The maximum number of fishing villages was in Puducherry district (17) and there was only one village in Mahe district. The number of fishing villages in the remaining districts are Yanam (12) and Karaikal 10.
- The total number of marine fish landing centres in Puducherry was 26, of which 16 belonged to Puducherry district.

Population

- There were 14,271 fishermen families in the Union Territory with a population of 54,627. The maximum number of families was in Puducherry district (7,088) followed by Yanam (3,754).
- Of the total fisherfolk population, Puducherry district accounted for 47% followed by Yanam (27%), Karaikkal (21%) and Mahe (5%).
- Among 14,271 fishermen families, 99.8% belonged to traditional fishermen.
- The average number of families in a village was 357, with 1,366 persons per village.
- The average family size was 3.8.
- Adults males constituted 32% and adult females and children 34% each of marine fisherfolk population in Puducherry.
- Women formed 50% of the population and the female to male ratio was 982 for 1,000 males. This ratio was maximum in Mahe district (1,125) and minimum in Karaikkal (956) district.

Poverty

- There were 10,998 (77%) families below the poverty line.
- Among the four coastal districts, the largest proportion of fishermen families below poverty line was found in Yanam district (96%) followed by Puducherry (73%) and Karaikal (67%).

Education

- In Puducherry, 64% of fisherfolk (excluding children below 5 years) were educated with different levels of education.
- About 24% of the fisherfolk had primary level of education, 32% had secondary level, 8% had above secondary level and the rest 36% of the population was unschooled.

Occupation

- There were 12,209 active fishermen of whom 11,510 were fulltime fishermen, 668 were part-time and the rest were engaged in fish seed collection.
- About 34% of fisherfolk excluding children were occupied with active fishing and 17% were associated with fishing allied activities.
- There were 6,010 fisherfolk engaged in fishing allied activities, such as marketing (64%), labourers (20%), making/repairing net (6%), curing and processing (3%) and peeling (1%).
- Women outweighed men in fishing allied activities accounting about 75%. Among the major fishing allied activities women dominated in marketing of fish (98%), curing/processing (98%) and peeling (90%).
- Largest number of fisherfolk engaged in fishing allied activities belonged to Puducherry district (57%) whereas this was only 0.2% in Mahe district.
- Major share 69% of those engaged in marketing of fish belonged to Puducherry district.
- Almost 97% of those involved in making/repairing net belonged to Karaikal district.
- Almost 60% of those involved as labourers belonged to Yanam district and 39% to Puducherry.

Religion

- Hindus constituted 99.7% of the fisherfolk families.
- Only 24% fisherfolk families belonged to SC/ST.

Membership in co-operatives

- About 71% of the adult fisherfolk were having membership in co-operative societies out of which 93% were in fisheries co-operative societies. This proportion was highest in Puducherry district.

Craft in the fishery

- There were 2,593 crafts in the fishery out of which 369 were mechanized, 1,562 motorized and non-motorized formed the rest.
- Almost 99% of the crafts in the mechanized sector were trawlers.
- Out of the total 367 trawlers in the Union Territory of Puducherry, 66% belonged to Puducherry district, 31% to Karaikal and 3% to Mahe.
- Nearly 73% of the motorized boats were operated in Puducherry district and 24% in Karaikal district.
- About 80% of non-mechanized boats were operated in Puducherry district.

Craft/Gear owned by the fisherfolk

- There were 3,109 crafts owned by fisherfolk, of which 405 were mechanized, 840 motorized and 1,864 non-motorized.
- Trawlers accounted for 69% of the mechanized crafts owned by fisherfolk, followed by gillnetters (25%).
- There were 679 fiber glass boats which accounted for 22% of the crafts owned by fisherfolk .
- Important gears owned by fisherfolk were gillnets (70%) and trawl nets (13%). Sharing pattern was more visible in gillnet.

Infrastructure

- In Puducherry, 72% of the fishermen houses were pucca houses.
- There were 39 primary schools, 8 secondary schools, 4 colleges and 2 technical institutions in the fishing villages of Puducherry.
- Nearly 93% of the fishing villages were electrified, 85% had bus stop/stand and 83% had cell phone coverage.
- There were 18 boat yards, 14 ice factories and 7 cold storages.
